What Care to Expect

The Wolverhampton Diabetes Service Model of Care

All diabetes service providers have agreed to work within a model of care in which roles and responsibilities are defined to ensure an effective and efficient service to people with diabetes

An overall model of care has been agreed by the Wolverhampton LIT based on the ethical and operational principles outlined. It utilises Integrated Care Pathways to promote a clear understanding of the roles and responsibilities of **Self Care, Primary Care, Specialist Care, Specialised Secondary and Tertiary Care.**
